

Terry & I give our permission to use any and all photos of our home improvements to be used as you need them. We also gladly submit the following:

Professional, Competitive, Craftsmanship; these are words used to help someone find a construction company they can trust to do wanted home improvements. My husband and I found such a company, that company is CAPCO Construction.

My husband and I after living in the same house for 25 years decided it was time to do much needed improvements; this included a new deck and siding for our house.

What impressed us with CAPCO Construction is the owner Frank. When the first phone call was made to ask for a quote on a deck, Frank didn't want to give a quote over the phone; he wanted to do it in person. Coming to our home and listening to what we wanted to do, seeing what needed to be done, and telling us honestly what he could provide was the greatest thing. Frank and his crew did everything that was promised; price, time of completion, and clean up. The new deck is absolutely wonderful.

Frank and his crew are working on the new siding. The job is nearly completed and we are so very pleased with the beautiful transformation of our house. Frank and his crew have been top notch while working on our home; they are friendly, informative, and always leave the condition of the work site orderly and safe.

My husband and I will let everyone in our neighborhood know who did this great work...CAPCO Construction. Job WELL DONE Frank, Thank You.

Sincerely,

Terry & Rene Bone
