**Re. Capco Construction – Residential Deck Construction**

Frank Caputo and his crew recently constructed a major addition to an existing small deck at my residence. It is indeed my pleasure to write this letter of recommendation on his behalf. Integrating the new construction with the old posed some challenges, but Frank was able to rise to the occasion. In the end the proof of excellence is in the details. The construction of the deck foundation is outstanding in both materials and design. The design and execution of the railings and steps was exceptional; excellent miter joints and overlapping splices make the difference. I can also commend Frank for his concern for customer satisfaction, not to mention an excellent clean up of the site after the job was done.

Well Done!

Sincerely,

Roger P. Trudelle, P. Eng.
